Notebook Preparations

Notebook rules:

Classroom Procedures

1. Begin Bell work and Weekly Work when you come into class everyday. This work will be in a folder assigned to your table. The manager will pick it up daily. It should be quiet when you are working. You will work individually. I want to know what you know. Place work back in your table's folder and then direct your attention to the day's agenda and objectives.
2. Agenda/objectives are where you will find the itinerary for the day. This helps avoid you asking, "What are we doing today?" We will go over the objectives three times every class. This is so that when your parents inquire what we did today you can tell them.
3. Planners: Daily I will tell you to get out your planner. This is not an option. I will tell you to open the planner to that day's date. I will then tell you the homework for the week. I have the right to add or delete items, so that is why we write the homework daily.
4. Active Participation is required in my class from all students. I use the white boards in my class to keep all students on track. You must give an answer on the white board. If you do not know the answer try your best. This lets me know quickly if I need to go back and think of a new way to teach what we are learning so that all understand the topic. It is ok to not know the answer!!! I think of class like a baseball practice. Class is practice before the big game which is your test!

Edit

Q.1

?

What is my name?

A Mrs. Jeffcott

C Mrs. Jeffsnot

B Mrs. Cullen

D Mrs. Jeffslott
